

Patient Comments

• Comfort

- *“It really is a lot more comfortable. I like it a lot better.”*
- *“It feels more comfortable on my face than other masks. It doesn't apply pressure like the other ones do.”*
- *“It's the most comfortable mask I've used. I don't get pressure above my nose; it doesn't rub against my lower lip.”*

• Seal and stability

- *“This mask doesn't leak like my previous mask did.”*
- *“The gel makes the seal tighter. No air escapes from it.”*
- *“It's holding its seal very well.”*

• Ease-of-use

- *“It's easy—you can put it on in the dark.”*
- *“Easier to take apart. Excellent mask to clean.”*

• Appeal

- *“That gel in there is fantastic. It's very comfortable against my skin.”*
- *“I like the gel because it forms to my face easier.”*
- *“I love how soft the mask is.”*

• Noise

- *“I don't even notice any sound.”*
- *“One of the quietest masks I've had.”*
- *“A lot of time my wife asks if it's on.”*

• Overall preference

- *“I'm very happy with the mask.”*
- *“It doesn't lose its seal and I sleep very well with it.”*
- *“I already have recommended it to someone.”*

ComfortGel™ Full Development

ComfortGel Full incorporates the legendary comfort of Respiration's gel technology in a completely new full-face mask to meet the demands of sleep professionals and patients. ComfortGel Full is a comfortable, easy-to-use mask with a *replaceable* gel cushion; a soft, premium forehead pad; and an SST™ (sure seal technology) silicone flap for a robust seal.

Our objective was to create the best full-face patient interface available, and we validated our objective with rigorous internal and external trials and testing. Overall, the ComfortGel Full is preferred over the ResMed Ultra Mirage™ and F&P FlexiFit™ 431/432 full-face masks.

Key Product Features	Respiration's ComfortGel Full Face Mask	ResMed Ultra Mirage Full Face	Fisher & Paykel FlexiFit 431/432
